

Project Design Phase

Problem – Solution Fit Template

Date	25 July 2026
Name	Shaik Suhail
Project Name	Automated Network Request Management in ServiceNow
Maximum Marks	2 Marks

Purpose & Overview

The **Problem-Solution Fit** framework ensures that the ServiceNow solution designed for handling user-initiated network requests directly addresses the real operational friction points, behaviors, and constraints experienced by enterprise requesters, managers, and fulfillment engineers.

Core Objectives Addressed:

- **Solve complex problems to fit customer needs:** Replaces manual, email-based network requests with an automated, self-service Service Portal workflow.
- **Succeed faster & increase adoption:** Leverages existing habits by offering one-click email approvals and portal tracking.
- **Improve existing processes:** Eliminates incomplete form submissions through dynamic field validation and automated task assignment.

Template:

Problem – Solution Fit Canvas: Automated Network Request Management

1. CUSTOMER SEGMENT(S) CS Who is your customer? • Enterprise Employees & Project Leads needing network access. • Network Operations Engineers managing changes. • IT Security Approvers maintaining compliance.	6. CUSTOMER CONSTRAINTS CC What constraints limit choices? • Strict internal IT security compliance mandates. • Fixed SLA resolution windows (8h / 24h). • Need for accurate CMDB data integrity without manual overhead.	5. AVAILABLE SOLUTIONS AS What solutions are available today? • Manual email requests sent directly to IT. • Paper-based or static ticket forms without validation. • Direct phone/chat escalations to network admins.
2. JOBS-TO-BE-DONE / PROBLEMS J&P Which problems do you address? • Request VPN, Firewall rules, and VLAN access efficiently. • Track real-time request fulfillment status. • Eliminate back-and-forth emails caused by invalid technical parameters.	9. PROBLEM ROOT CAUSE RC Why does this problem exist? • Legacy email workflows lack dynamic form validation. • No automated approval routing or auto-task creation. • Disjointed catalog items without CMDB integration.	7. BEHAVIOUR BE What does customer do to address it? • Sends daily follow-up emails to IT support. • Guesses technical IP parameters on unvalidated forms. • Escalates directly to line managers to bypass queues.
3. TRIGGERS TR What triggers customers to act? • New employee onboarding or project kick-offs. • Blocked server/application connectivity during deployments. • Audit findings requiring strict network access logs.	10. YOUR SOLUTION SL ServiceNow Automated Network Request Item: • Catalog Item & UI Policies: Dynamic forms with IPv4 Regex. • Flow Designer: Automated multi-tier approval & sc_task routing. • CMDB & SLAs: Auto-updates cmdb_ci_netgear and tracks SLAs.	8. CHANNELS OF BEHAVIOUR CH 8.1 ONLINE: ServiceNow Service Portal, Automated Email Notifications. 8.2 OFFLINE: Direct Team Standups, Security Audit Reviews, IT Escalation Calls.
